How to locate your Samsung Galaxy device with SmartThings Find

Feedback

If you lost your Galaxy phone, tablet, watch, or earbuds, you don't need to worry. The SmartThings Find feature allows you to lock, locate, or completely wipe your data. Even your Samsung Wallet payment information can be locked or erased, and all of this can be done remotely. There are also similar services available for your watch and earbuds within the Galaxy Wearable app.

Note: Available screens and settings may vary by wireless service provider, software version, and model. These services can only locate your device if it is powered on. SmartThings Find replaced Find My Mobile.

- SmartThings Find 
- Find your Samsung Galaxy device with SmartThings Find 
- Track a missing phone or tablet
